PHREESIA FOR
Veradigm

Phreesia gives Veradigm clients a comprehensive suite of tools to manage patient intake across a range of primary care and specialty settings. Our highly customizable solution provides an individualized patient experience, enabling healthcare organizations to better engage, educate and activate patients in their care.

Phreesia

With Phreesia, our Veradigm clients can:

✔ **Offer patients a modern intake experience with Mobile,** allowing them to conveniently register from the comfort and privacy of their own personal device

✔ **Drive more of the appointments they want** with targeted health campaigns and online appointment requests to improve clinical care and boost profitability

✔ **Automate the delivery and scoring of targeted clinical screenings,** such as the PHQ-9, Epworth Sleepiness Scale and Pain Intensity Scale, to gather critical patient-reported data

✔ **Privately ask patients social determinants of health questions** to better understand their needs and connect them to appropriate services, enhancing the patient experience and clinical care

✔ **Offer flexible payment options to patients,** including payment plans, card on file, online payments and email or text payment reminders to boost collections and decrease bad debt

✔ **Automate eligibility and benefits verification** to save staff time and reduce denied claims

Four-time Veradigm® Connect
Partner of the Year

The Phreesia difference

Across Phreesia's Veradigm network:

12M check-ins annually

83% patient satisfaction with Phreesia

76% of patients pay their copay during self-service check-in

47M eligibility and benefits checks completed annually across entire Veradigm network *(powered by Phreesia)*

"Phreesia's integrated workflows allow our staff to focus on the patient rather than data entry. We expected Phreesia to improve our bottom line, but we never expected how much it would impact and improve the way we interact with patients."

– Amy Smith, Director of Business Operations, The Jackson Clinic
